Diganti ke Bahasa Inggris

Ganti ke Format /Standart USDT

Nominal Rupiah Ganti menjadi **Amount USDT**

The screenshot shows the ARCHIDAX Voucher Creation interface. It features two main sections: 'General Voucher' and 'Special Voucher'. Both sections have a 'Nominal Rupiah' input field. The 'General Voucher' section also includes a 'Create Voucher' button. The 'Special Voucher' section includes a 'Recipient's Email' input field, a 'PIN Redemption' input field, and a 'Create Voucher' button. Below these sections is a 'Voucher Creation History' table with columns for Time, Voucher Code, Amount, and Status. The table is currently empty, and there is a 'Download CSV' button. A 'Helpdesk' button is located in the bottom right corner. Annotations with orange arrows point to the 'Nominal Rupiah' input fields in both sections and the 'PIN Redemption' input field in the 'Special Voucher' section.

General Voucher

Nominal Rupiah

- The maximum voucher withdrawal is Rp. 250,000,000 per day
- Vouchers per day are accumulated with the total withdrawal of Rupiah

Create Voucher

Special Voucher

Nominal Rupiah

Recipient's Email

PIN Redemption

- The maximum voucher withdrawal is Rp. 250,000,000 per day
- Vouchers per day are accumulated with the total withdrawal of Rupiah
