ARCHIDAX

INTRODUCTION

The appearance of Bitcoin and other crypto assets revolutionized financial transactions, creating new ways to pay and send online without going through a pre-existing or banking - based payment system. Depending on how they evolve, crypto assets have the potential to create an open and borderless world of finance.

Currently, crypto assets based on blockchain technology are experiencing increased use by various companies. This has resulted in a very rapid increase in the number of users in the crypto and blockchain industry as evidenced by the current number of trades reaching USD 1.63 Trillion in 24 hours with a total of more than 7000 coins/tokens traded. This is very positive progress in this industry. Departing from this, Archidax Exchange is here to provide contributions and answers to crypto users around the world.

CRYPTO EXCHANGES PROBLEM AND SOLUTIONS THAT ARCHIDAX OFFERS

1. Non-Transparent Trading Liquidity

Many Exchanges currently display trade data that are not real, where the trades displayed are executed by a system or bot that executes transactions, but in reality, this is just fake data and is not traded using real assets. Archidax exists to provide Transparent Trading Liquidity with real crypto assets. In addition, with proper asset management at Archidax, we will be able to provide fast and secure execution of our customers' requests.

2. Many Exchanges are Scam

Many exchanges have made losses and even stole from their users due to bad intentions in running these exchanges. One example is SISTEMKOIN, an exchange platform from Turkey that has committed fraud and harmed many users. Archidax exists to guarantee that users don't get scammed or lose their crypto assets when trading on our exchange.

3. Many Exchanges are Less Selective About The Assets Traded

We have seen many crypto assets traded on exchanges around the world eventually die because they are not supported by a community, user, and ecosystem base so that it has the potential to harm users and traders on these exchanges because many exchanges only focus on listings and profit from the listing fees without thinking about the future impact.

Archidax present as a platform that is selective in choosing cryptos to be listed for trading, especially cryptocurrencies that have been supported by the community and ecosystem.

4. Security Issues on Exchange Systems

We have seen so many exchanges that have been broken into by hackers who managed to steal and result in losses and loss of coins/tokens of these exchanges users. There were even some exchanges that closed their operations due to excessive losses.

ARCHIDAX's advanced security protections keep your crypto assets safe. ARCHIDAX stores various crypto assets in a multi-signature wallet that is protected by multiple layers of encryption.

ARCHIDAX AS A NEW GENERATION EXCHANGE PLATFORM FOR A BETTER FUTURE

Archidax Exchange exists as a platform that answers various problems faced by crypto users today. With technology developed and supported by a community network and integration with all systems in the ecosystem, it will provide the best service to Archidax Exchange users with global standards and supported by multi-languages.

Roll Out Feature

SPOT Market (Live Now)

This feature makes it easy for crypto users to trade with asset ownership in hand and is supported by 15 global crypto assets for the first stage and will continue to grow according to global market developments and interests.

Derivative Market (On Development)

Like you are trading on the Futures market/Forex. crypto can also be traded as such. Provides real-time data and prices with prices according to CMC, Coinecko, and Coinpaprika standards standard.

Launchpad (Live Now)

Launchpad is a platform that allows you to enjoy greater profits by being the first coin/token Buyer on projects offered by developers before they launch and trade on crypto exchanges. The projects offered on our Launchpad have passed the screening process and KYC and due diligence in detail so that each published project is ensured to have a project value that is following Archidax principles and minimizes the potential for scams in the projects offered.

LENDMARK (On Development)

Lendmark is a peer-to-peer Lending Platform between fellow users on archidax where coins are offered to users ranging from 5% p.a to 17% p.a with a variety of coins of more than 35 coins both ERC-20 and TRC-20 with disbursement and returns in the form of ETH, USDT, BTC, CGOLD, and TRON.

Wallet

Archidax Wallet interface showing the following sections:

- Asset Value:** Estimated Value of Assets: **USDT 1003278421318.0149**, Balance: **USDT 996515595542.3322**.
- My Assets:** A table listing 7 assets with columns: No., Coin Name, Explorer, Active balance, Frozen Balance, Estimated Assets (USDT), Status, and Action (Deposit, Withdraw).
- Accumulated Profit:** Start Date: **dd/mm/yyyy**, End Date: **18/06/2021**, Choose...
- Maker Fees:** Trading Volume: **0 IDR**, 24h Withdrawal Limit: **0 BTC**.

Archidax Asset Value section showing:

- Estimated Value of Assets:** **USDT 1003279160871.1466**
- Balance:** **USDT 996515595542.3322**

Archidax Accumulated Profit section showing:

- Start Date:** **dd/mm/yyyy**
- End Date:** **18/06/2021**

Archidax Deposit section showing:

- Setor Kripto:** BTC (Bitcoin) details: Active Balance: **182799.05502303998 BTC**, Frozen Balance: **3.1974421095045e-14 BTC**, Asset Estimation (USDT): **USD 6.763.565.035.852**.
- Deposit Crypto History:** A table with columns: Time, Type, Amount, From, To, TX, Status.

Deposit

Archidax Deposit section with two main buttons:

- Deposit Crypto** (blue button)
- Withdraw Crypto** (orange button)

Withdraw Crypto

Archidax Withdraw Crypto section for **BTC (Bitcoin)** showing:

- Active Balance:** **182799.05502303998 BTC**
- Frozen Balance:** **3.1974421095045e-14 BTC**

Crypto Board Analytics

The image displays the Archidax platform, available on both desktop and mobile devices. The desktop version features a dark-themed dashboard with five main coin price charts: Bitcoin, Ethereum, Binance Coin, Codeo Gold, and Waves. Each chart includes a 24-hour volume, the highest and lowest prices, and a percentage change. Below these charts are four sections: 'Top Coin Based on Volume in last 24H', 'Top Loser', 'Top Gainer', and 'Frequency', each listing the top 10 coins in that category. The mobile version of the app follows a similar structure, with a large Bitcoin price chart at the top, followed by Ethereum, Binance Coin, and Waves sections. The overall design is clean and modern, using a color palette of dark blues, purples, and orange for the coins.

Revenue Stream

Archidax Exchanges Revenue Model will come from the following sources :

Exchanges Fee	Archidax will charge 0.2% for every trade made and only will be charged to market takers. There are some promotions when discounts are made on certain coins.
Withdrawal Fee	Archidax may charge a withdrawal fee but with a very low fee.
Listing Fee	The listing fee is charged according to the level of complexity of the coin/token of the project submitted to Archidax.
Sharing Data	Archidax offers data sharing via an API and helps other exchanges get more credible and faster data.
Other Fees	For other fees, it is adjusted to the conditions and cooperation created with the other parties so as to generate the agreed benefits.

Archi Token
